

The 'I Do It!' program creates a fictional environment or virtual world called 'I Do It!' park where there are many places designed for learning the social skills and self-management skills we need for school and to enhance day to day interactions. Central to the program are Australian Animal puppets that have a club in the park, and it is through club activities that the students engage in and practice social skills including Manners, Emotions, Anger Management, Friendship, Turn Taking and Sharing. The Park includes areas like Manners Cafe, Cooperation Playground and Feelings Pool.
